**Robert L. Duncan
State Senator**

Robert L. Duncan was born in Vernon, Texas on August 5, 1953. He is married to Lynne Stebbins Duncan of Dallas. Together they have two children, Lindsey and Matthew. Robert received his bachelor degree in Agricultural Economics from Texas Tech University in 1976. While attending Tech he served as student body president, was a member of the Phi Delta Theta Fraternity and the Texas Tech Athletic Council. In 1981, he received his Doctor of Jurisprudence from the Texas Tech University School of Law and joined the Lubbock law firm of Crenshaw, Dupree and Milam, where he is a partner.

Robert's first working experience with the State Legislature started in 1989 as he served as the general counsel for the Senate State Affairs Committee. In 1992, Robert was elected to represent District 84 in the Texas House of Representatives, and in 1996 he was elected to the State Senate.

During the 76th Legislative Session, Senator Duncan served on the Senate Finance Committee. He was also tapped to serve as Vice Chairman of the Senate Criminal Justice Committee and named to the Senate Committee on Border Affairs.

Senator Duncan was recently appointed to serve as Vice Chair of the Senate National Resources Committee. Additionally, he serves on the Senate Finance, Jurisprudence, and Redistricting committees for the 77th Legislative Session. He has also been appointed by the Texas Comptroller to spearhead a legislative advisory committee for the e-Texas Commission.

GRADUATE SCHOOL OF BIOMEDICAL SCIENCES**

Ron J. Anderson, M.D.

Ron J. Anderson, M.D. is President and Chief Executive Officer of Parkland Health and Hospital System, the general public hospital for Dallas County, Texas and the primary teaching hospital for the University of Texas Southwestern Medical Center at Dallas.

Dr. Anderson became Chief Executive Officer of Parkland in 1982. He previously served as Parkland's Medical Director for Ambulatory Care and Emergency Services. Dr. Anderson has remained on the faculty of the Medical School as Professor of Internal Medicine and continues to see patients and teach house staff physicians at Parkland.

Dr. Anderson served on the executive committee of the State Task Force on Indigent Health Care and in 1985 played a major role in the passage of landmark legislation concerning indigent health care in Texas. He was appointed Co-Chair of the Attorney General's Task Force to study not-for-profit hospitals and unsponsored charity care in 1988, and served as a member of Governor Richard's Health Policy Task Force in 1991-1992. Dr. Anderson is past chairman of: the Dallas-Ft. Worth Hospital Council, the Texas Association of Public and Non-Profit Hospitals, the Texas Board of Health, and the National Association of Public Hospital Association. Dr. Anderson was a member of the Kaser Commission on the Future of Medicaid. He was elected to the prestigious Institute of Medicine of the National Academy of Sciences in 1997.

In 1994, he received the John P. McGovern Award for Humanitarian Medicine and Lectureship from the Association of Academic Health Centers. Just recently, he received the American Public Health Association Award for Excellence in recognition of exceptionally meritorious contributions to the improvement of the health of the people.

COMMENCEMENT ADDRESS SCHOOL OF PHARMACY

John A. Gans, Pharm.D.

John A. Gans is the Executive Vice-President and Chief Executive Officer of the American Pharmaceutical Association. Since 1970, he has been professionally affiliated with the Philadelphia College of Pharmacy and Science, where he earned his pharmacy degree in 1966 and his doctorate in pharmacy in 1969. He also served on the faculty from 1980-88 and Dean of the School of Pharmacy until May 1989 when he was appointed to his current position. Dr. Gans' career began in 1966 as a community pharmacist in Broomall, Pennsylvania and served a residency at the Hospital of the University of Pennsylvania 1967-68. Following his residency, he became Assistant Director of Pharmacy at the Hospital of the University of Pennsylvania. From 1974-1985, he served as the Managing Director of Pharmaservices, a consultant firm to nursing homes.

Dr. Gans' research interests included the original work in the development of total parenteral nutrition in dogs and humans for which he received a research award in 1972 from the American Society of Hospital Pharmacists.

Dr. Gans has served as the Chairman of the Delaware Valley Regional Poison Control Program which established a 24-hour regional poison control center in 1985. He has also served as President of the Pennsylvania Society of Hospital Pharmacists and President of the American Society of Hospital Pharmacists. Other honors include the PCP&S Alumni Award and the Harvey A.K Whitney Lecture Award presented by the American Society of Health-system Pharmacists.

Dr. Gans' commitment to the profession of pharmacy is not limited to the United States. He has been actively involved in international pharmacy for many years. He served as the Pan American Federation of Pharmacy Secretary-General and as Vice President for North America for two consecutive terms. He has also been a member of the International Pharmaceutical Federation (FIP) Council where he was part of a Working Group on Public Policy. He was elected Vice President to the FIP Bureau in 1998.

AFFIRMATION OF COMMITMENT

We believe the nature and purpose of nursing is providing a caring response to human needs. We believe the practice of professional nursing provides nurses and clients a unique opportunity to share the wonder, pain and awe of human existence.

We further believe that to fulfill our commitment to those needing nursing care we must:

require increasing expertise from our colleagues;
function as advocates for our clients;
continue to "*develop organization, economic, political, legal and ethical climates that support nursing values and expertise*;" increase collegial relationships with others in the health care field; and support a spirit of professional unity.

With caring at the heart of our profession, we dedicate ourselves to our clients and each other. Today, we publicly affirm our commitment to our clients, our colleagues and our profession.

Written by Mary Slater, 1983 Graduate, School of Nursing, Texas Tech University Health Sciences Center. Italic words are from the "Declaration of Belief" (p. 61) by Margaret M. Styles ON NURSING-TOWARD A NEW ENDOWMENT. St. Louis: C.V. Mosby Company, 1982.

AWARD FOR EXCELLENCE IN NURSING

The Award for Excellence in Nursing recognizes graduating students who have best exemplified nursing through the philosophy of HOLISM in patient care. Viewing an individual as a unified whole encourages HOLISM for the patient, the family and the nurse.

Nursing's unique contribution is its interactive process emphasizing care--that element which promotes the comfort of individuals and the development or restoration of their resources for self-care. Nursing as an art and a science is demonstrated in multiple settings, clinical arenas and roles. It centers care on the individual, group and society and the response to health care needs. In order to practice professional nursing in its ultimate sense, a nurse must use a HOLISTIC approach.

The School of Nursing faculty selects outstanding graduates who best demonstrate the philosophy of HOLISM. Awardees receive a monetary award and a nautilus. Because of its concentric, unending spirals, the nautilus is a HOLISTIC symbol of the continuity and interrelatedness of health to individuals and their environment and also of nursing in its multiple aspects.

ALLIED HEALTH AFFIRMATION

As a graduate of the School of Allied Health at Texas Tech University Health Sciences Center, I hereby affirm that I will use my knowledge and skills responsibly. I will endeavor at all times to demonstrate my commitment to the principles of altruism, equality, freedom of choice, justice, dignity, truth and prudence. I will make professional decisions within the framework of my profession's Code of Ethics. I hereby commit to be a life-long learner, continually improving my professional knowledge and skills. I accept the responsibility of being an advocate for my patients and for my profession.

I make these promises solemnly, freely and upon my honor as a graduate of Texas Tech University Health Sciences Center. I make this affirmation knowing that allied health professionals can make powerful contributions to health and well-being through their passionate commitment to helping individuals and communities.

OATH OF HIPPOCRATES

(Revised)

I do solemnly swear by that which I hold most sacred, that I will be loyal to the Profession of Medicine and just and generous to its Members.

That I will lead my life and practice my Art in uprightness and honor.

That into whatever house I will enter, it shall be for the good of the sick to the utmost of my power.

I, holding myself aloof from wrong, from corruption, from the tempting of others to vice, that I will exercise my Art solely for the cure of my patient and will give no drug, perform no operation for a criminal purpose, even if solicited, far less suggest it.

That whatsoever I shall see or hear of the lives of men which is not fitting to be spoken, I will keep inviolably secret.

These things do I promise. And in proportion as I am faithful to this, my oath, may happiness and good repute be ever mine. In the opposite if I shall be foresworn.

OATH OF A PHARMACIST

At this time, I vow to devote my professional life to the service of all humankind through the profession of pharmacy.

I will consider the welfare of humanity and relief of human suffering my primary concerns.

I will apply my knowledge, experience, and skills to the best of my ability to assure optimal drug therapy outcomes for the patients I serve.

I will keep abreast of developments and maintain professional competency in my profession of pharmacy.

I will maintain the highest principles of moral, ethical, and legal conduct.

I will embrace and advocate change in the profession of pharmacy that improves patient care.

I take these vows voluntarily with the full realization of the responsibility with which I am entrusted by the public.

SCHOOL OF PHARMACY

The Bowl of Hygieia is an internationally recognized symbol for the profession of pharmacy. Universally depicted as a snake wrapped around a bowl; it comes to us from Greek mythology. Hygieia is the daughter of Zeus and the goddess of purity. Her bowl represents medicine and the snake indicates potency. Taken altogether, the Bowl of Hygieia symbolizes "pure and potent medicines."

The Bowl of Hygieia is awarded to a graduating Doctor of Pharmacy candidate who best exemplifies the qualities most desirable in a pharmacist. Most important of these attributes include leadership, high ethical standards, dedication, and promotion of the profession of pharmacy.

Faculty and students alike choose the recipient of this distinguished award. Candidates are nominated by fellow students and endorsed by a letter of support from a faculty member. Selections are then made by an awards committee consisting of three faculty members. All Texas Tech University Health Sciences Center School of Pharmacy campuses are represented on the committee.

The recipient is given the honor of carrying in the Bowl of Hygieia at the commencement ceremony. The recipient also holds the privilege of leading the class in the recitation of the Oath of the Pharmacist. The Bowl of Hygieia, along with a special plaque engraved with each recipient's name, will stand on display throughout the year at the Amarillo campus of the School of Pharmacy.

Recipients of the Bowl of Hygieia

2000	Susan Lynn Burgoyne Cordi, Pharm.D.
2001	Jeanie Elizabeth Jaramillo, Pharm.D.
2002	Shawn Anthony Gautreaux, Pharm.D.

TEXAS TECH UNIVERSITY HEALTH SCIENCES CENTER

A Brief History

On May 27, 1969, enabling legislation was passed making possible the creation of the Texas Tech University School of Medicine. Three years later, a remarkably short time in which to develop a comprehensive medical education program, the School of Medicine opened its doors to 36 freshmen and 25 juniors. It was August 21, 1972. The first class graduated in 1974.

In 1979 the name of the School was changed to the Texas Tech University Health Sciences Center, paving the way for the development of additional health professional schools. Accordingly, a School of Nursing was approved and the first nursing students were admitted in 1981. That same year the School of Allied Health was funded and physical therapy students began arriving twelve months later.

By 1983 two allied health programs in medical technology (now referred to as clinical laboratory science) and occupational therapy were initiated. Ten years later Tech's Department of Speech & Hearing Sciences transferred to the School of Allied Health and renamed the Department of Communication Disorders. Continued growth in Allied Health is exemplified by the expansion of the occupational therapy and physical therapy programs onto the Amarillo and Odessa campuses and the Physician Assistant program at Midland College. The growth of the school continues with the addition of five new degree programs in the last two years. They include: Athletic Training, Vocational Rehabilitation, Emergency Medical Services Management, Molecular Pathology and Doctor of Science in Physical Therapy. The first master degrees in occupational therapy and physician assistant studies were awarded in 2001, and more first will take place today with the conferring of the following degrees: Doctor of Audiology, Master of Athletic Training and Bachelor of Science in Emergency Medical Services Management.

In 1987 the School of Medicine formalized an integrated dual doctoral degree program, one leading to the Doctor of Medicine degree, the other to the Doctor of Philosophy degree. A milestone was reached when the Health Sciences Center graduated its first three candidates from the M.D./Ph.D. program in May 1994. In collaboration with Texas Tech's Rawls College of Business Administration, the School of Medicine admitted the first students to a joint degree program, M.D./M.B.A., in 1998 with its first three students completing the combined program in 2001. Today, two will be recognized as they receive their M.D./Ph.D. degrees and another six will receive their M.D./M.B.A. degrees.

The Graduate School of Biomedical Sciences offers master and Ph.D. degrees in seven research areas. In 2001, the Graduate School conferred the first pharmaceutical sciences degree and celebrated the awarding of its 100th doctor of philosophy degree. The School of Pharmacy, based at the Health Science Center's Amarillo campus, graduated its inaugural class of Pharm.D.'s in May 2000.

Today, Texas Tech University Health Sciences Center is a dynamic, multi-campus school with educational programs in Amarillo, El Paso, Lubbock, Odessa and Midland, and a student enrollment of over 1,700. With this graduating class, the institution boasts over 6,000 alumni, including physicians, scientific researchers, nurses, allied health professionals and pharmacists practicing in nearly every state of the union and several foreign countries. Of particular pride is the fact that the majority of these graduates have chosen to remain in Texas to serve the health care needs of its citizens.

ACADEMIC DRESS AND PROCESSING

The wearing of academic dress at commencement dates from the early history of the oldest universities somewhere in the twelfth or thirteenth century. Since educated people were almost always of the clergy, the black gown is somewhat of an adaptation of the *cope*, a mantle of *silk* or other cloth worn by church dignitaries in procession and on other occasions. The long gown and *cowl* (similar to the academic hood of today) were worn by priests and monks for warmth in the cold medieval buildings.

In the early centuries, a great diversity of color and style of cap, gown, and hood appeared in different universities of Europe. The European custom of wearing academic dress was later introduced at American colleges. Not until after 1895 was a uniform academic code of dress code adopted by most colleges and universities in the United States. Today, the black robe, hood, and cap are worn at most institutions of higher learning.

The gown is cut differently for the bachelor's, master's, and doctor's degrees. Usually the bachelor's robe has long pointed sleeves; the master's has closed sleeves, square at the end with a slit at the elbow; the doctor's is faced with velvet and has round open sleeves with three bars of velvet.

The doctor's hood has side panels and is slightly longer than the one worn for the master's degree. The color used in the velvet border of the hood indicates the field of study. The velvet border is widest on the doctor's hood. The color of the lining of the hood indicates the college or university that conferred the degree. For example, those who have received advanced degrees from Texas Tech University wear hoods lined with red.

The Oxford -- the so-called mortar board -- is black and has a long tassel fastened to the center. The tassel is usually worn with the pendant over the left front of the cap. Different colored tassels are often worn on the bachelor's and master's caps to indicate the type of degree. The tassel on the cap of the doctor's candidate, except for professional degrees, is either gold or black.

Candidates for the undergraduate degree will wear the tassel on the right side of the cap at commencement. After the degrees have been conferred, baccalaureate degree recipients will turn the tassel to the left side of the cap, thus showing that they are now graduates.

All candidates for the undergraduate degree who wear the medallion are honor students who possess a minimum 3.50 grade average and will graduate *Cum Laude*, *Magna Cum Laude*, or *Summa Cum Laude*.
